

Python Developer

EXPERIENCE

[Nightcore Bot | Developer \(July 2025 - Present\)](#)

A Discord bot for the Arizona RP gaming community. Built from scratch, actively maintained, used by real community.

- Developed core features: economy system (coins, transfers, shops), multiplayer casino roulette, clan system with dedicated channels, battle pass with voice activity tracking, moderation, logging
- Added composite indexes for leaderboards, casino, and transfer queries to optimise database performance
- Improved background task performance by switching from batch transactions to per-item processing
- Maintained PR-based workflow (43+ merged PRs) and conventional commits
- Currently developing a frontend dashboard (NuxtJS) for system configuration and moderator management
- **Technical Stack:** Python 3.13, discord.py, SQLAlchemy (asyncpg), PostgreSQL 16, Alembic, Pydantic v2, Docker, TypeScript, NuxtJS

[What Now? | Maintainer \(March 2026 - May 2026\)](#)

AI-powered web platform for people caring for an elderly or ill loved one.

- Implemented end-to-end flow from a multistep intake form to a structured AI response
- Built the RAG pipeline on PostgreSQL + pgvector with semantic chunk retrieval and cosine-distance filtering
- Developed embedding-based social-service matching with optional latitude/longitude radius filtering
- Added a separate tasks for automated law downloading and document ingestion
- **Technical Stack:** Next.js 16, React 19, TypeScript, Tailwind CSS 4, Leaflet, Python 3.13, FastAPI, PostgreSQL 16 + pgvector, SQLAlchemy (asyncpg), Alembic, sentence-transformers, Docker, Celery, RabbitMQ, Playwright

[MCP Explorer | Maintainer \(Jan 2026\)](#)

A Full-Stack web app for testing and exploring MCP servers. Connect to any MCP server using STDIO. Inspecting/calling tools.

- Designed & developed the backend: connection management and communication layer with MCP servers using the official MCP SDK
- Designed & developed the frontend: connection panel, tools list panel, tool calling panel, results dialog, copy-to-clipboard feature
- **Technical Stack:** Python 3.13, FastAPI, Pydantic v2, MCP SDK, TypeScript, NextJS, React, Docker

[REST API Collection | Maintainer \(May 2024 - Jul 2024\)](#)

Two reference REST APIs for user management built with different Python frameworks.

- Designed & developed Litestar API: CRUD operations using repository/service patterns, JWT authentication, Redis caching layer, full database layer
- Designed & developed FastAPI API: CRUD operations using repository/service patterns, database layer with Alembic migrations
- **Technical Stack:** Python 3.13, FastAPI/Litestar, SQLAlchemy (asyncpg), PostgreSQL 16, Alembic, Redis, Pydantic v2, JWT, Docker

ACHIEVEMENTS

- **Hackathons:** [Participant - Ústí nad Labem Hackathon \(2025\)](#), [3rd place - Děčín Hackathon \(2025\)](#), [3rd place \(new projects\) - Prague Hackathon \(2026\)](#), [Participant - Ústí and Labem CreaThon-Hackathon 2026](#)
- **Internship:** 2x 10-day practice at [DCUK](#) (Datové centrum Ústeckého kraje), Ústí nad Labem. Regional data center providing ICT solutions for public administration.

EDUCATION

- **Information Technologies | Secondary Technical School in Teplice, Czech Republic (3rd year, Expected graduation: 2027)**

LANGUAGES English (B1) • Czech (B1) • Ukrainian (C2/native speaker)

HOBBIES Programming • Walking • Computer Games
